Professional Summary

A dedicated web developer specializing in backend engineering since 2022, I have delivered secure, scalable solutions for various industries. My projects include building a top-up platform that handles over 5,000 monthly transactions and an ecommerce site that increased user retention by 25%. By leveraging Laravel, I consistently create optimized and maintainable backend architectures.

As a freelance developer, I have successfully tailored solutions to meet specific client requirements. In addition, I mentor aspiring developers through the Google Developer Student Club, guiding students in mastering web technologies and improving their technical capabilities.

Experience

Web Developer - Freelance

Oct 2023 - Present (Remote)

- Developed and maintained multiple web applications focusing on backend development with PHP, Laravel, and PostgreSQL.
- Built an e-commerce platform that served over 1,000 users, integrated a payment gateway, and optimized SQL queries, improving query efficiency by 30%.

Assistant Mentor Web Developer Division - Google Developer Student Club

Nov 2023 - Sep 2024 (Hybrid)

- Guided students in mastering frontend and backend web technologies including HTML, CSS, JavaScript, and PHP through workshops and mentoring sessions.
- Successfully mentored over 50 students, resulting in improved technical understanding and project completion rates.

Full Stack Developer - Roleplay Studio

Mar 2023 - Oct 2023 (Internship)

- Developed dynamic company profile websites using HTML, CSS, and JavaScript, integrating interactive animations to enhance user engagement.
- Collaborated with designers and project managers to ensure seamless user experience and functional alignment with business objectives.

Full Stack Developer - CV. Purnama Kreatifa

Sep 2022 - Dec 2022 (Internship)

- Built a location-based attendance system with PHP, MySQL, and geofencing technology, simplifying employee attendance tracking for remote workers.
- Ensured seamless functionality by collaborating closely with crossfunctional teams to meet business requirements.

Education

Telkom University

Associate's Degree in Computer Science, Sep 2023 - Sep 2027

Relevant Coursework: Software Development, Database Systems, Algorithms & Data Structures, Machine Learning, Artificial Intelligence.

Activities:

- Assistant Tech Mentor at Google Developer Student Club
- Assistant Lecturer in Database Systems, Programming Algorithms, and Data Visualization

 Collaborated with researcher lecturer team to develop a community website project.

SMKS Antartika 2 Sidoarjo

Vocational High School Graduate in Software Engineering, Aug 2020 - Jun 2023

Relevant Coursework: Web Development, Database Systems, Algorithms & Data Structures, Object Oriented Programming.

Activities:

- Member of Software Engineering Extra Curricular
- Participant in District Level Web Technology Student Competency Competition

Skills

Programming Languages: JavaScript, PHP, SQL

Frameworks: Laravel, Express, CodeIgniter

Databases: PostgreSQL, MySQL **Tools:** Git, Node.js, Docker

Other: Database Optimization, API Integration

Languages

- English (Professional Working Proficiency)
- Indonesian (Native)
