PROFESSIONAL SUMMARY

Backend engineer with production experience in Go, Laravel and Node.js. Currently a Backend Engineer Intern at Meda Technology, building Meda Billing, a multi-tenant school billing and admission platform, and Waras, an AI-based health consultation app, with Go, Echo, PostgreSQL and Redis, including a payment gateway migration from Xendit to DOKU. Previously spent over a year at Weekend Inc. on AYO KASIR and AYO QONCIERGE, Laravel microservices platforms for PT HM Sampoerna. Focused on clean architecture, database performance and reliable payment flows.

TECHNICAL SKILLS

- **Languages:** Go, PHP, JavaScript, TypeScript, SQL
- **Frameworks & Runtime:** Echo, Laravel, Node.js, Express.js, CodeIgniter
- **Databases & Caching:** PostgreSQL, MySQL, Redis, GORM, Knex.js, Query Optimization, N+1 Query Resolution
- **Payments:** Xendit, DOKU, Payment Gateway Integration, Payment Webhooks, Idempotent Transactions
- **Architecture & APIs:** RESTful API Design, Microservices, Clean Architecture, Domain-Driven Design, Service Layer Pattern, Multi-Tenancy
- **DevOps & Tools:** Docker, AWS (EC2, S3), Jenkins CI/CD, Git, Husky, Commitlint, Structured Logging
- **Practices:** Agile/Scrum, Code Review, System Observability, Performance Optimization

PROFESSIONAL EXPERIENCE

Backend Engineer Intern, Meda Technology October 2026 – Present

- Build backend services in Go (Echo, GORM, PostgreSQL, Redis) for Meda Billing, a multi-tenant school billing and student admission (PPDB) platform for Indonesian school foundations, and for Waras, an AI-based health consultation app.
- Contributed to tech stack and architecture decisions for both products, including clean architecture layering (domain, repository, usecase, handler) and Redis for sessions, caching and task queues.
- Integrated Xendit as the online payment gateway, then independently migrated the full payment flow to DOKU.
- Develop REST APIs and backend modules with every monetary value handled through shopspring/decimal for exact financial calculation.

Backend Engineer, Weekend Inc. (Client: PT HM Sampoerna) July 2025 – September 2026

- Built and maintained backend services for AYO KASIR and AYO QONCIERGE, two production B2B/B2C platforms for PT HM Sampoerna on a Laravel-based microservices architecture (see Projects).
- Designed and implemented RESTful APIs following clean architecture and service-layer patterns.
- Enforced code quality across Node.js, Laravel and .NET repositories with Husky, Commitlint and diff-based linting pipelines.
- Supported deployments to AWS through Jenkins CI/CD pipelines in an Agile/Scrum team, from sprint planning to retrospectives.

Web Developer, Freelance October 2023 – July 2025

- Built backend applications with PHP, Laravel and PostgreSQL for small and mid-sized businesses.
- Built and ran Synn Store, a live game top-up store serving 1,000+ users (see Projects).

Assistant Mentor, Google Developer Student Club November 2023 – September 2024

- Mentored 50+ students in web development technologies.
- Ran hands-on workshops and project-based learning sessions.

Full Stack Developer Intern, Roleplay Studio March 2023 – October 2023

- Developed interactive company profile websites and web applications with designers and project managers.
- Turned Figma designs into reusable components and backend endpoints.

Full Stack Developer Intern, CV. Purnama Kreatifa September 2022 – December 2022

- Built a location-based attendance system with geofencing.
- Worked with cross-functional teams to design, build and test application features.

PROJECTS

AYO KASIR by SRC (Production, Weekend Inc. for PT HM Sampoerna) Laravel, PostgreSQL, AWS, Jenkins

- Point-of-sale and retail microservices used by stores in Sampoerna's retail network to run sales and stock, with wholesale partners on the same system (ayo.src.id).
- Built and maintained the staff management, coach management and order management modules.
- Resolved N+1 query issues and reworked indexes on slow endpoints to improve response times.

AYO QONCIERGE by SRC (Production, Weekend Inc. for PT HM Sampoerna) Laravel, Node.js, PostgreSQL, Docker

- Operations platform for field coaches and staff across Sampoerna's retail network, built on clean architecture with clear domain boundaries.
- Built role-based authorization for staff and coaching personnel, plus structured audit logs and error handling around critical changes.
- Kept REST contracts stable for the frontend and third-party consumers.

Synn Store (Production, Freelance) PHP, Laravel, MySQL, PostgreSQL

- Game top-up store for players in Malaysia, serving 1,000+ users (synnmlbb.com).
- Wrote idempotent payment webhook handlers so retried callbacks never credit an order twice.
- Tuned indexes for order lookups and transaction reports; built the admin panel for sales, stock and invoices.

Multi-Currency E-Wallet Backend (Personal) Express.js, PostgreSQL, Knex.js

- Ledger-based wallet API with ACID transactions, decimal-safe money arithmetic and Idempotency-Key support for retried requests.
- Prevented overdraws and deadlocks with SELECT ... FOR UPDATE row locks taken in sorted wallet order; documented with OpenAPI 3 and Swagger UI.

Order Management System (Personal) Go, net/http, GORM, PostgreSQL, JWT

- Clean-architecture order API with interface-based handler, service and repository layers and no web framework; validates users and products concurrently with goroutines and processes orders through a buffered-channel worker.

EDUCATION

Telkom University September 2023 – September 2027 (Expected)
Associate Degree in Computer Science

SMKS Antartika 2 Sidoarjo August 2020 – June 2023
Software Engineering
